# first...treat the primary disorder, of course then... add **VITERRA**<sup>®</sup> as a matter of course

Metabolic stress hitchhikes along with every primary disorder. By simply adding VITERRA early in treatment, you combat stress by providing a comprehensive nutritional buildup program.

VITERRA is not just a vitamin, but a complete nutritional replenishment. Supplies both the 10 essential vitamins and 11 important minerals, the "metabolic energizers" which are a key to enzyme action. Together, vitamins and minerals satisfy tissue hunger and help speed recovery.

Specify the VITERRA form which best suits your — and your patient's needs. (1) VITERRA Capsules, for daily supplementation. In bottles of 30 and 100. (2) When capsules are a problem, VITERRA TASTITABS, which can be chewed, swallowed, or mixed in liquids. Ideal for children. In bottles of 100 and 250. (3) VITERRA THERAPEUTIC, when high potencies are indicated. In bottles of 30 and 100.

## Compazine\* Ampuls

for immediate control of nausea and vomiting  
when oral administration is not feasible

In 98% of cases treated with 'Compazine' Ampuls during clinical trials, a single intramuscular dose completely stopped nausea and vomiting or reduced its severity enough to permit tablet administration.

**Dosage:** An initial dose of 5 to 10 mg. (1 to 2 cc.) should be injected *deeply* into the upper outer quadrant of the buttock. This may be repeated if necessary at intervals of 3 to 4 hours.

For further information, see S.K.F. literature.

**Available:** 2 cc. (10 mg.) ampuls in boxes of 6 and 100. 5 mg. and 10 mg. tablets in bottles of 50 and 500.

'Compazine' the outstanding antiemetic  
with minimal side effects

# "SUDDENLY

I felt dizzy..."

Look out for the "little" strokes resulting from abnormal capillary fragility. Many cerebral accidents may be avoided if adequate amounts of capillary protective factors—hesperidin complex and ascorbic acid—are provided.<sup>1</sup>

The true character of the "little" strokes lies in their elusiveness—a sudden dizzy spell, temporary numbness of a hand, bizarre feeling of pain, or subtle personality change. Such symptoms are typical of little strokes and usually pass quickly, but they are likely to recur.<sup>2,3</sup>

Early recognition can gain vital therapeutic time. Hesper-C provides hesperidin complex and vitamin C essential for the protection of the capillaries to prevent further damage.

1. Gale, E. T., and Thewlis, M. W.: *Geriatrics* 8:80, 1953. 2. Alvarez, W. C.: *Geriatrics* 10:555, 1955. 3. Conference on Cerebral Vascular Disease, American Heart Association, Princeton, N. J., January, 1957.

# Hesper-C

*Available:* As capsules—and NEW Hesper-C Liquid for your geriatric patients.

*Provides:* 100 mg. hesperidin complex plus 100 mg. ascorbic acid per capsule or teaspoonful (5 ml.) of syrup.

**Be** 6 capsules or teaspoonfuls daily, or more. No toxicity or untoward effects have ever been reported even with massive doses.

## 24 steps to a hospital bed

The commonest task, such as climbing a flight of stairs, confronts the angina pectoris patient with a fearful question: "Will I be able to make it?"

**Exertion leads to attacks . . .** and fear of attacks leads to an increasing restriction of activities. Ultimately, even the attack-free intervals may lose all semblance of normal living.

**Remove the fear factor.** In 4 out of 5 patients, routine prophylaxis utilizing Peritrate reduces the incidence and severity of anginal attacks, improves abnormal EKG tracings and increases exercise tolerance.

A new sense of freedom restores the "cardiac cripple" to a sense of usefulness and participation, although he

should not now indulge in previously prohibited strenuous exercise.

**Peritrate prophylaxis is simple:** 10 or 20 mg. *before meals* and at bedtime. The specific needs of most patients are met with Peritrate's five convenient dosage forms: Peritrate 10 mg. and 20 mg. tablets; Peritrate Delayed Action (10 mg.) for protection continued through the night; Peritrate with Phenobarbital (10 mg. with phenobarbital 15 mg.) where sedation is also required; Peritrate with Aminophylline (10 mg. with aminophylline 100 mg.) in cardiac and circulatory insufficiency.

**Usual Dosage:** A continuous schedule of 10 to 20 mg. *before meals* and at bedtime.

# Peritrate®

(brand of pentaerythritol tetranitrate)
